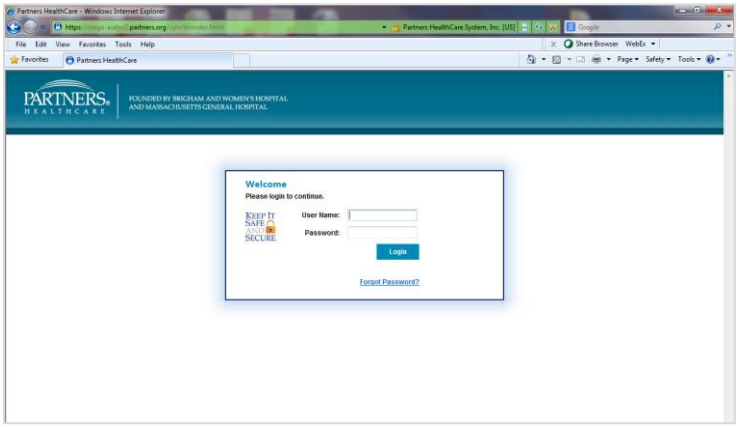
LMR Alert

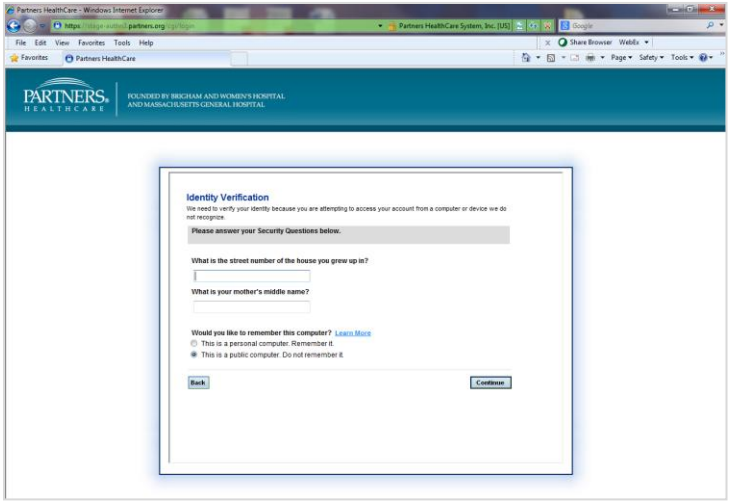
On March 10, 2015 – the LOTI login page will be updated. This change is the first step in an effort to increase application security.

1. New Home Page – Login Button

2. Login Page



3. Identity Verification (challenge questions)



What will change after March 31, 2015?

Along with your LOTI user name and password, you will be required to enter a confirmation code, delivered via text message or phone call to a number you have pre-registered.

A different code may be required each time you attempt to access LOTI on a new computer, or from a computer that Partners believes to be public or not secured.

This extra security feature is known as two-factor authentication. Most banks / financial institutions employ this technology.

How do I pre-register my phone number?

If you haven't already registered a phone number, do the following:

From a computer on Partners Network

1. Go to https://myprofile.partners.org.
2. Enter your Partners user name and click Log In.
3. If prompted with security questions enter the appropriate answers and click Continue.
4. Enter your Partners password and click Log In.
5. Under *MyProfile Information*, click **Update my Phone Numbers**.
6. Add your mobile or land line phone number (up to three numbers).

If you are at a location off the Partners Network

1. Contact your practice manager or e-mail your LMR analyst for more information on how to provide your mobile number.

What other changes will I notice?

As of March 31, 2015 you will no longer use your security questions to verify your identity when accessing LOTI.

If you need assistance, please contact your IS Service Desk.
Thank you for your efforts to keep our environment safe and secure.
